FLEXIBLE MATERIAL HANDLING SYSTEMS

For over six decades, Tier-Rack has been at the forefront of providing the best in portable rack solutions and flexible warehouse racking systems. Our models are tailored to suit each customer, offering the ultimate in versatile storage solutions.

Your Complete Storage Provider for:

- **Stacking Racks**
- **Pallet Stacking**
- **Custom Turnkey Systems**
- **Bins**
- **Carts**
- **Used Racks**

High Quality – Great Service – Low Prices

YOUR SOLUTION FOR

FLEXIBILITY

Our racks are innovatively designed to collapse and nest, optimizing storage space when not in use.

VERSATILITY

Our racks are highly adaptable and can be easily reconfigured to meet changing market demands without incurring excessive setup times or additional expenses.

CAPACITY

Our racks can accommodate large, bulky merchandise while still ensuring effortless accessibility, even in spaces traditional pallet racking is not feasible.

EFFICIENCY

Our racks permit the stacking of multiple loads while feeding or collecting materials from assembly lines, making them perfect for work-in-process storage. They also provide an efficient means of transferring products between plants.

PROTECTION

Our racks are designed to safeguard your materials and finished products, with optional side containment available when necessary to prevent crushing and other forms of inventory damage. Quality stacking enhances safety and productivity for your team.

USED BY

- Warehousing
- Distribution Centers
- Production Manufacturers
- Shipping and Transportation

FOR USE WITH

- Tires
- Automotive Components
- Carpeting and Padding
- Pipe and Tube
- Steel Coil
- Palletized Product
- Anything and Everything

THE LOAD-NESTER

The Load-Nester® all-steel storage rack features light and heavy duty models of solid all-welded, knock-down, or nestable designs for all your material handling needs.

Load-Nester® portable stacking racks can protect products from damage, permit economical dense storage of seasonal goods, provide containment for difficult to store items, and reduce the cost of material handling within your operation.

Used in manufacturing, warehousing, shipping, cold storage – just about anywhere

- Securely stacks 3-5 rows high
- Can be made to handle products of almost any size or weight
- Customizable options or standard ready-to-ship options available

CUSTOM ENGINEERED

Racks can be customized to your needs.

Models can be adapted to include:

- Decking material options
- Stack connecting options
- Fork stirrups
- Casters
- Custom paint colors & stencils
- Containment panels / fold down sides
- And many more

Our engineer has been designing stack racks for us for over 25 years! Using the best technology your custom storage system utilizes:

- Complete prototype rack design
- 2-D and 3-D CAD systems
- Detailed structural analysis
- PE stamps, available when required

READY TO SHIP

When time is of the essence our stock of ready-to-ship racks are available in our most popular sizes to get you storing quickly, safely, and efficiently.

Ask if our standard size stack racks are right for you.

PRE-OWNED

Talk about value, our pre-owned racks have a lot of life left in them! Our stock is always changing — inquire about availability.

Have racks to sell? We buy used stack racks.

Call us at 1-800-325-7869, ext. 239 to learn more.

THE ORIGINAL TIER-RACK STACKING FRAME

THE INDUSTRY STANDARD SINCE 1955

In 1955 a pallet maker in mid Missouri was looking for a way to help his customers maximize the use of their warehouse space. The result was the pallet stacking frame and he named his company Tier-Rack.

Tier-Rack developed a storage rack system that has been used ever since by various industries to store tires, boxes, fabric, pipe, electronics, bicycles, furniture, food, beverages and anything else you can imagine.

CARTS & BINS

Not everything is easily stored. When your storage needs include delicacy, diversity, and options our carts and bins are made to make your work easier.
